Our value proposition is to help you value-your-time and value-your-money.

We believe in empowering individuals by upgrading and skilling them to make them competitive by understanding best practices of industry and current trends and updates. We are aimed at developing careers for the individuals by offering value-added training programmes.

GST - Still a curiosity?

GST - Goods and Services Tax, which came into effect since 1st July 2017, aims to replace all indirect taxes levied on goods and services by the Indian Central and State Government, and is proposed to be a comprehensive indirect tax levy on manufacture, sale, and consumption of goods as well as services at the national level.

- Its main objective is to consolidate all indirect tax levied into a single tax, except customs (excluding SAD) replacing multiple tax levies, overcoming the limitations of existing indirect tax structure, and creating efficiencies in tax administration.
- By amalgamating many Central and State taxes into a single tax, it would mitigate cascading or double taxation in a major way and pave the way for a common national market.
- From the consumer point of view, the biggest advantage would be in terms of a reduction in the overall tax burden on goods, which is currently estimated at 16%-18%.
- It makes products competitive in the domestic and international markets.
- GST being transparent in nature, it becomes easier to administer.

After 5 years of GST implementation, yet it is constantly being amended with many new required updates which individuals, companies and professionals need to know about.

About this programme

In this programme, experts shall guide you in how GST implications on business can be handled strategically and what are the major issues to be pondered upon while framing financial policies of the business. GST is an Indirect Tax which has replaced many Indirect Taxes in India.
